

CURRICULUM VITAE

Name: Hernqvist, Per Håkan Erik

Born: 1950-01-09

Address: Alfhöjdsgratan 6, 431 38 Mölndal

Telephone: 031-160683 mobile 0709-670009

Mail: hernqvist@hctconsulting.se

Profile and qualities:

I have worked in the pharmaceutical business for 39 years, first within marketing and the last 30 years within clinical research. In this area I have conducted all moments within clinical trials, from protocol development to report and publication. I have also been responsible author of an expert report and a study summary in an application for a new indication. I have been monitoring studies for 17 years and in parallel been heading a clinical research department with the responsibility for all phase II-IV studies within the Gastrointestinal Area (Losec and Nexium) in Sweden for AstraZeneca during 1983-2003. Year 2003 AstraZeneca changed to a more generic, non therapeutic area managed, organization and my job became more focused on line management and coaching of coworkers (18 persons during 2009).

After leaving AstraZeneca in 2010 I have had several various assignments through my own consultant agency, among others at Mölnlycke Health Care, Quintiles and Abigo Medical.

My strength is to see complex issues from a practical point of view, simplifying work while maintaining quality standards according to ICH or SOPs.

I am a diplomatic person, having the ability to communicate difficult matters in a positive way, and also having the ability to encourage and motivate other people to develop and do more than is expected from them.

Employment:

Hernqvist Clinical Trials Consulting:	Full clinical trial services provider through own consultant agency 2010-
AstraZeneca Sweden AB:	Dep Clinical Operations: Clinical Operations Manager 2006-2010 Dep Global Clinical Trials: Director 2004-2006 Dep Clinical Research Gastrointestinal: Director 1999-2003
